1 Introduction

1.1 Purpose

This document defines the **Audit Module** of the TEFCONNECT platform. The Audit Module is the **validation and eligibility gate** that determines whether an entrepreneur is approved for seed capital disbursement.

This document is intended for **TEF stakeholders, governance teams, product owners, and system developers** to ensure a shared understanding of the audit process before financial disbursement.

1.2 Scope

This SRS covers only the **Audit Module** and its direct interfaces.

The Audit Module begins **after** an entrepreneur has completed:

- Identity & business verification
- Training (LMS)
- Pitching

1.3 System Context

The Audit Module sits between the **Program Operations layer** and the **Finance layer** and acts as the **single financial eligibility gate**.

1.4 System Actors

Actor	Role in Audit
Super Admin/TEF Admin	Approves and manages Auditors (via self-registration)
Audit Admin	Manages governance and oversight
Auditor (Audit User)	Performs detailed audit review and records their feedback on each application

1.5 System Entry & Exit Points

- **Entry into Audit**
An entrepreneur enters the Audit Module only when all upstream program stages are complete and all required documents exist.
- **Exit from Audit**
An entrepreneur exits the Audit Module only when a final decision is recorded:
 - **ENDORSED** → sent to Finance
 - **DISQUALIFIED** → application closed

No further modification or resubmission is allowed after audit entry.

2 Overall System Overview

2.1 Audit Module Objective

The objective of the Audit Module is to ensure that **only compliant, eligible, and non-fraudulent entrepreneurs** receive seed capital.

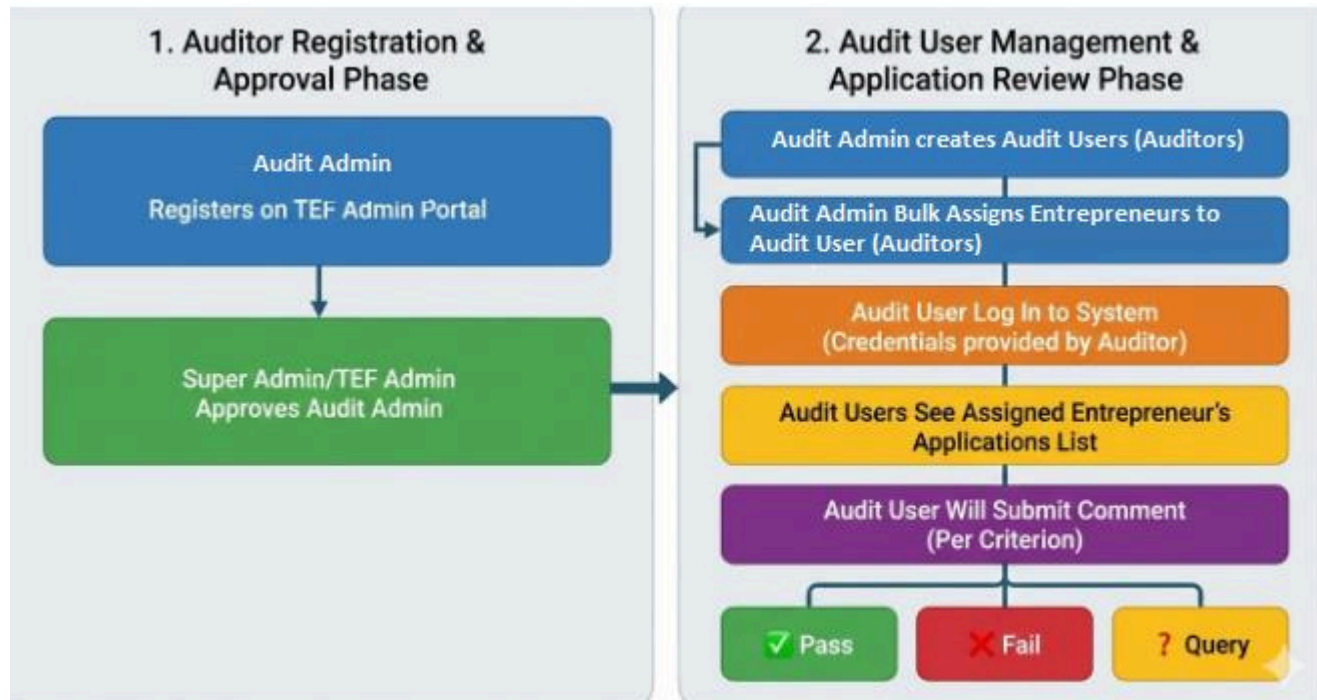

The Audit Module acts as:

- The **fraud-detection and compliance layer**
- The **system of record** for all funding eligibility decisions

No entrepreneur can reach the Finance Module without passing through the Audit Module.

2.2 Process Flow

Audit Admin **will register themselves** from the admin portal.

2.3 Final Audit Decision

After reviewing all evidence, the Auditor records:

Option	Meaning
ENDORSED	Eligible for Finance processing
DISQUALIFIED	Ineligible or non-compliant

Transition to Finance Module

The Audit Module completes when the entrepreneur's applications is endorsed/disqualified after final reviewal of the auditor. Henceforth, the Finance module will lead with the Endorsed applications.

3 Role-Based Audit Flow

Role	Functionality Description
TEF Admin	Approve or reject the registration request submitted by the Audit Admin.
	View and manage auditors including add, update, approve, and reject actions.
	Import existing auditors into the system.
	Respond to queried applications raised during the audit process.
	View applications that are under audit in read-only mode.
Audit Admin	Register on the audit portal, obtain TEF Admin approval, log in, and access the Audit Admin Dashboard with tiles for Total Applications, Endorsed, Disqualified, Queried, Reviewed, and Admin Responded Queries.
	Manage auditors via User Management, including viewing auditor details (User ID, Username, Email ID, assigned entrepreneurs, status), searching users, activating/deactivating auditors, and adding new audit users with required credentials.
	Manage entrepreneurs through Application Management , including viewing audit status (Not Started, In Progress, Queried, Reviewed, Endorsed, Disqualified), filtering by Program/Country/Language/Status, searching applicants, adjusting pagination, and bulk assigning auditors based on Country, Language, and Audit User.
	Access Review Criteria Structure to view instructions, detailed module information, comment history, evaluation results (Pass, Fail, Query), and latest comments for modules such as User Profile, LMS, and Pitching.
	Make audit decisions by marking applications as Endorsed or Disqualified after review, reverting decisions back to Review for auditors, and providing remarks during decision changes.
	In case of disqualifying the audit application of the entrepreneur, the audit admin has the option to move the application back to review either to the same user (auditor) or different user.
	Monitor queried applications raised by auditors, track TEF Admin responses, and access the Audit Log containing timestamped audit actions.
	Added by Audit Admin, logs in using credentials, and accesses the Auditor
Auditor (Audit User)	Dashboard with tiles for Total Assigned Audits, In Progress Audits, Queried Applications, Reviewed Applications, and Admin-Responded Queries.
	Access Application Management to view entrepreneur details (Audit ID, Application ID, Name, Email ID, Country, Status), including filtering by Program/Country/Language/Status and searching entrepreneurs.
	Access Review Criteria to view instructions and module details (User Profile, LMS, Pitching), evaluate modules by assigning Pass, Fail, or Query with comments, and view latest comments in the text box.
	Access the Audit Log to view all audit-related actions with timestamps.

4 Key Features

Key Feature	Description	Primary Role(s)
Audit Admin Onboarding	Enables registration of Audit Admin users through the admin portal and approval by TEF Admin.	TEF Admin
Auditor User Management	Allows creation, activation/deactivation, and management of auditor accounts.	Audit Admin
Application Allocation	Enables assignment of entrepreneur applications to auditors based on country and language.	Audit Admin
Audit Review and Evaluation	Allows auditors to review application modules and assign Pass, Fail, or Query results.	Auditor
Query Handling	Allows auditors to raise queries and TEF Admin to respond to them.	Auditor / TEF Admin
Audit Decision Management	Enables Audit Admin to mark applications as Endorsed or Disqualified after review. He can also move the application back to review either to the same user or to the different.	Audit Admin
Audit Tracking and Logging	Maintains timestamped logs of all audit actions for traceability and monitoring.	Audit Admin / Auditor

Audit Admin

- Audit admin registers itself on the audit portal.
- The approval of the audit admin is done by tef admin.
- After the approval the audit admin logs in the audit portal using the credentials and lands on the audit admin dashboard that shows tiles -
 - o Total application (entrepreneurs)
 - o Endorsed Application
 - o Disqualified Application
 - o Queried Application (By the Auditor (audit user))
 - o Reviewed Application
 - o Admin responded queries (queries responded by TEF admin)
- On the menu bar there appears an option of user management which shows the details of the auditor (audit user) to the audit admin.
- The details on the user management are -
 - o User ID
 - o Username
 - o Email ID
 - o Number of entrepreneurs assigned to them
 - o if the user is active or inactive
 - o action.
- The audit admin can search the auditor (audit user) using the search option available.
- Audit admin can make the auditor active or inactive by clicking on the button.
- The audit admin can add a new audit user by clicking on the new audit user button. The credentials required for the addition of new audit user are -
 - o First name (Mandatory)
 - o Middle Name
 - o Last Name (Mandatory)
 - o Company name (Mandatory)
 - o Email ID (Mandatory)
 - o Alternate Email ID
 - o Country (Mandatory)
 - o Language
 - o Password creation and confirmation (Mandatory)
- By clicking on application management, Audit admin sees the details of the entrepreneur, the status (not started, in progress, queried, reviewed, endorsed and disqualified) of the audit for an entrepreneur.
- They can filter the entrepreneurs by
 - o Program
 - o Country

- o Language
 - o Status.
- They can bulk assign the audit user(auditor) to the entrepreneur using -
 - o Country (mandatory)
 - o Language
 - o Audit user (Mandatory)
- While assigning the audit users to the entrepreneurs they can change the number of applicants visible on single page by clicking on the option “**Page**” visible.
- The audit admin can also search the entrepreneur, with the use of the search option provided on the application management.
- In the application management by clicking on action there appear two options of review criteria and audit log.
- **Under Review Criteria Structure** - Under Review Criteria, modules such as **User Profile, LMS, and Pitching** must include:
 - o **Instructions** – Information on what is to be done
 - o **View Detail** – Complete information related to the specific module or field (User profile, LMS, pitching etc) and evaluation done by the audit user(auditor) pass, fail and query and latest comment made.
 - o **Comment History** – A complete thread of all audit-related comments for that specific module (User Profile, LMS, Pitching, etc.).
 - o If the result is pass for all the modules and the status of the applicant shows as reviewed there is the option of **endorsed and disqualified**.
- The audit admin can convert the decision from endorsed/ disqualifieds to review which goes to audit user for review.
- The audit admin gives remarks as well while making the decision of endorsed, disqualified and review.
- If the query is raised by the Auditor (audit user), it is shown as the status “queried” on the application management to the audit admin which is resolved by the TEF admin.
- The Audit Log must display all actions performed during the audit process, along with proper timestamping.

TEF Admin -

- TEF admin has the functionality to approve or reject the registration of audit admin.
- TEF admin views all the Manage Auditors (add/update/approve/reject)
- Import existing auditors
- Respond to queried application
- View Applications being audited (read only)

Auditor (Audit User)

- Audit user(auditor) is added to the Audit by the audit admin.
- He logs in using the credentials and lands on the dashboard page.
- He sees the tiles -
 - o Total assigned audit
 - o In Progress Audit
 - o Queries application
 - o Reviewed Application
 - o Admin-responded Queries
- By clicking on application management, the audit user(auditor) can see all the details of the entrepreneurs.
 - o Audit ID
 - o Application ID
 - o Name
 - o Email ID
 - o Country
 - o Status
- By clicking on application management, Audit admin sees the details of the entrepreneur, the status of the audit for an entrepreneur.
- They can filter the entrepreneurs by -
 - o Program
 - o Country
 - o Language
 - o Status.
- The auditor (audit user) can also search the entrepreneur, with the use of the search option provided on the application management.
- In the application management by clicking on action there appear two options of review criteria and audit log.
- Under the review criteria,
 - o **Instructions** – Guidance on the actions to be taken while reviewing details.
 - o **View Detail** – Complete information related to the specific module or field (User profile, LMS, pitching etc).
- By viewing the details of each module of the applicant, they can give the results of pass, fail and query.
- Each pass, fail and query will have a comment, the latest comment will be visible in the text box.
- The Audit Log must display all actions performed during the audit process, along with proper timestamping.

5 Audit Module – Process Flow

5.1 Audit Admin Onboarding and Access

- Audit Admin registers on the Audit Portal by submitting registration details.

- TEF Admin reviews the registration request and performs approval or rejection.
- Upon approval, Audit Admin logs into the system and lands on the Audit Admin Dashboard.
- The dashboard provides visibility into overall audit progress through status tiles.

5.2 Auditor Setup and User Management

- Audit Admin accesses the User Management section from the menu bar.
- Auditor (Audit User) profiles are viewed with details such as User ID, Username, Email ID, assigned entrepreneurs, and active/inactive status.
- Audit Admin can search auditors, activate/deactivate them, and create new auditor accounts by entering required credentials.
- Newly created auditors become available for assignment within the audit process.

5.3 Application Allocation and Monitoring

- Audit Admin navigates to Application Management to view entrepreneur applications and audit status.
- Applications are displayed with statuses including Not Started, In Progress, Queried, Reviewed, Endorsed, and Disqualified.
- Applications can be filtered using Program, Country, Language, and Status, and searched using the search option.
- Audit Admin assigns auditors to entrepreneurs through bulk assignment using Country, Language, and Audit User selection.
- Pagination controls allow adjustment of the number of applicants visible per page.

5.4 Audit Review and Evaluation

- Assigned Auditor logs into the portal and accesses the dashboard displaying assigned audit workload.
- Auditor opens Application Management to view entrepreneur details such as Audit ID, Application ID, Name, Email ID, Country, and Status.
- Through Review Criteria, modules including User Profile, LMS, and Pitching are accessed.
- Each module contains Instructions and View Detail sections to guide evaluation.
- Auditor evaluates modules by selecting Pass, Fail, or Query and provides comments, with the latest comment visible in the interface.

5.5 Query Handling and Administrative Response

- When a query is raised by the Auditor, the application status changes to Queried.
- TEF Admin accesses queried applications and provides responses.
- Admin-responded queries become visible to both Audit Admin and Auditor through dashboard indicators.

5.6 Audit Admin Validation and Final Decision

- Audit Admin reviews module-level evaluation results through the Review Criteria Structure, including instructions, detailed views, and comment history.
- If all modules are marked Pass and the application status becomes Reviewed, Audit Admin selects either Endorsed or Disqualified.
- Audit Admin may revert an Endorsed or Disqualified decision back to Review for further evaluation.
- Remarks are recorded during decision actions.

5.7 Audit Tracking and Logging

- Throughout the process, Audit Log records all actions performed during auditing.
- Both Audit Admin and Auditor can access the log to view timestamped activities for traceability.

6 Role-Based Functional Requirements

6.1 TEF Admin / Super Admin

Objective

To manage governance and oversight of the audit process by approving audit administrators, managing auditors, responding to audit queries, and monitoring audit activities.

Functional Description

The TEF Admin supervises the audit process and ensures that appropriate personnel are authorized to perform audit activities within the system.

The TEF Admin reviews and approves registration requests submitted by Audit Admin users.

Additionally, the TEF Admin manages auditors by performing operations such as adding, updating, approving, rejecting, or importing existing auditors into the system.

During the audit process, the TEF Admin also responds to queries raised by auditors and monitors entrepreneur applications currently under audit through read-only access.

Workflow

1. TEF Admin logs into the Admin Portal.
2. Reviews Audit Admin registration requests.
3. Approves or rejects the registration request.
4. Accesses auditor management interface.
5. Adds, updates, approves, rejects, or imports auditor records.

6. Reviews queries raised by auditors during application evaluation.
7. Provides responses to queries through the system.
8. Monitors entrepreneur applications currently under audit.

Business Rules

1. Audit Admin registration must be approved by TEF Admin before access is granted.
2. Only TEF Admin can manage auditor approvals and imports.
3. TEF Admin has read-only access to entrepreneur applications during the audit process.
4. Queries raised during the audit must be addressed by TEF Admin.

6.2 Audit Admin

Objective

To manage the operational audit process including auditor management, application allocation, monitoring of audit activities, and final audit decision making.

Functional Description

The Audit Admin is responsible for managing the audit process within the platform.

After registering on the audit portal and receiving approval from the TEF Admin, the Audit Admin gains access to the Audit Admin Dashboard.

The dashboard provides an overview of audit progress through status indicators such as:

- Total Applications
- Endorsed Applications
- Disqualified Applications
- Queried Applications
- Reviewed Applications
- Admin Responded Queries

The Audit Admin manages auditor accounts, assigns entrepreneur applications to auditors, monitors evaluation progress, and reviews module evaluation results before recording final audit decisions.

Workflow

1. Audit Admin registers on the Audit Portal.
2. TEF Admin reviews and approves registration.
3. Audit Admin logs into the platform.
4. Dashboard displays audit status metrics.
5. Audit Admin accesses User Management to manage auditors.

6. Audit Admin creates or modifies auditor accounts.
7. Audit Admin accesses Application Management.
8. Filters and searches entrepreneur applications.
9. Assigns applications to auditors through bulk assignment.
10. Monitors evaluation progress.
11. Reviews evaluation results.
12. Records final decision as **Endorsed or Disqualified**.

Business Rules

1. Audit Admin registration must be approved by TEF Admin.
2. Auditor accounts must be created before assignment of applications.
3. Applications can be assigned to auditors based on country and language.
4. Only reviewed applications are eligible for final decision.
5. Final decisions must include remarks when required.
6. Endorsed or Disqualified decisions can be reverted back to review if necessary.

6.3 Auditor (Audit User)

Objective

To evaluate assigned entrepreneur applications by reviewing module details and recording audit outcomes.

Functional Description

The Auditor reviews assigned entrepreneur applications and evaluates module information including:

- User Profile
- LMS
- Pitching

Each module contains detailed information to support evaluation.

The auditor evaluates the modules by assigning results:

- Pass
- Fail
- Query

Each evaluation must include comments explaining the assessment outcome.

Workflow

1. Auditor logs into the platform.

2. Accesses the Auditor Dashboard.
3. Views assigned audit workload.
4. Opens Application Management.
5. Reviews entrepreneur application details.
6. Accesses Review Criteria for modules.
7. Evaluates each module.
8. Records Pass, Fail, or Query decision.
9. Submits comments explaining evaluation results.

Business Rules

1. Auditors evaluate applications only assigned to them.
2. Each module must receive an evaluation result.
3. Queries raised during evaluation must be addressed by TEF Admin.
4. All evaluation actions must be recorded in the audit log.

7 Audit Module Process Flow

The audit process follows these stages:

1. Audit Admin registration and approval.
2. Creation and management of auditors.
3. Assignment of entrepreneur applications.
4. Auditor review and evaluation.
5. Query handling and administrative response.
6. Audit Admin validation and final decision.
7. Audit tracking and logging.

8 Audit Decision Logic

After reviewing all evidence, the auditor records the evaluation results for each module.

If the application is fully reviewed, the Audit Admin records the final decision.

Decision	Meaning
Endorsed	Entrepreneur is eligible for finance processing.
Disqualified	Entrepreneur is not eligible for funding.

Once a final decision is recorded, the application exits the Audit Module.

9 Audit Tracking and Logging

The Audit Log records all actions performed during the audit lifecycle.

The log provides:

- Timestamped activity records
- User actions
- Decision changes
- Evaluation updates

The audit log ensures transparency, traceability, and accountability throughout the audit process.
